Q: What is the issue?
A: Larkspur’s streets and roads continue to rank among the worst in Marin County. In a community survey conducted earlier this year, residents indicated these types of repairs should not only be addressed, but also accelerated. The City seeks to do so before work on our streets, roads, and major boulevards becomes even more expensive in the future.

Q: What is Measure B?
A: To accelerate repairs to our streets, roads, potholes and major boulevards, the Larkspur City Council unanimously placed Measure B on the November ballot with the goal of completing these projects over the next five years. If enacted, Measure B extends the existing, voter-approved general local sales tax at the ¾ cent rate, generating approximately $1.65 Million annually for City services including:

✓ Road and pothole repair
✓ Emergency services
✓ Storm drain maintenance

Q: What input will the community have in the Measure B road repair plan?
A: The Public Works Director and City Manager have already conducted a number of neighborhood engagement conversations to get input. If Measure B is enacted, consistent with our current outreach we will update residents on the schedule/location of repairs and continue to solicit ideas and answer questions.

Q: Is Measure B fiscally accountable?
A: Yes. Our City prides itself on its fiscally conservative budgetary practices and accountability. If enacted, Measure B will maintain Independent Citizens’ Oversight to ensure that all voter-approved funds continue to be spent towards priorities identified by voters. For Oversight Committee reports and related information, please visit the City website.

Q: Where can I get more information about the election?
A: As a Municipal Election, City Council seats will also be on the ballot. For election-related information, please visit our city website or the County of Marin Elections Department at www.marincounty.org/depts/rv
