Dear Mayor Haroff and Larkspur City Council Members,

I first wish to thank you for considering the adoption of Climate Emergency Resolution for your City.

I am a member of the Marin Climate Emergency Resolution Committee but am writing as an individual to say I am very much in favor of the changes David Moller has suggested in his email of 10/4. In particular I hope you hope you reinsert the statement regarding the need for "urgent action" and that your Council will elevate climate issues to be a "high priority" in its annual planning process.

It is my opinion that our world's environmental situation has become so very serious at this point in time that we must ALL act with great speed to ensure a livable earth for our children and the children of the future. We need "all hands-on deck" now! We all need to consider this issue as "urgent" and of "high priority". Our country and the world are facing a host of serious issues but to me this is the one that looms above all.

Thank you for considering my request.
